Appalachian Mountain Club Protects 4,311 Acres in Maine with Baker Mountain Purchase

Scenic and ecologically significant lands on and around Baker Mountain in the 100-Mile Wilderness region near Greenville are now permanently protected following purchases by the AMC in late January, with assistance from The Nature Conservancy (TNC).

The purchases by the nation’s oldest conservation and recreation organization conserve the second highest peak in Maine between Bigelow Mountain and Katahdin, as well as the headwaters of the West Branch of the Pleasant River, a vibrant wild brook trout fishery. The property lies within an unfragmented roadless area of mature hardwood and softwood forest, which also includes the preferred habitat of the rare Bicknell’s thrush.

“Baker Mountain was surrounded by conservation lands, but the Baker Mountain tract itself was not protected. It was ‘the hole in the doughnut,’ and with this purchase, AMC and its conservation partner, TNC, have ensured that this ecologically significant land will be protected,” said AMC Senior Vice President Walter Graff.

The land will be managed for a variety of uses, including recreation, habitat protection, and sustainable forestry. AMC will be providing pedestrian access to the land.

AMC purchased two adjacent parcels abutting its Katahdin Iron Works property: 3,111 acres from the conservation easement on the first parcel covering about three-quarters of Baker Mountain, including its 3,521-foot summit, to ensure permanent protection of the land’s ecological values, he said.

Peg Nation Honored by AMC

Maine Chapter member Margaret (Peg) Nation was honored by the Appalachian Mountain Club at its Annual Summit January 24, 2015. Peg was one of only five volunteers to receive the Volunteer Leadership Award recognizing all she has contributed to the Club over the last 30 years. Calling her a “quintessential essential AMC volunteer,” the award recognized her 30-year membership and volunteerism activities for two chapters and the Club itself. Peg has been a Chapter Chair, Vice Chair, Conservation Chair, Membership Chair, At-Large member, Information Volunteer, Pinkham backcountry specialist, volunteer naturalist, hike leader, nature trail developer, and editor of the Maine Mountain Guide.

Peg’s began her AMC activities on the Executive Committee of the newly-formed Washington, D.C. Chapter as Membership Chair, then Vice-Chair, then three years as D.C. Chapter Chair. In those positions, she worked on the hot issues of the day: controlling the pollution in Chesapeake Bay and working with the National Park Service to maintain trails at Great Falls National Park and the Chesapeake and Ohio towpath. She was instrumental in planning a Club-wide Fall Gathering on the Eastern Shore (complete with a Maryland crab feast).

When she moved north from D.C., Peg joined the Maine Chapter and quickly became involved with our chapter. She has been on the Maine Chapter’s Executive Committee as At-Large member followed by three years as Chapter Conservation Chair and Co-Chair, and Chair of the Chapter committee responsible for updating the 2005 version of the Maine Mountain Guide.

With the Club, Peg is an Alpine Steward and Volunteer Naturalist in Mount Washington’s Alpine Garden just below the summit. She has lead spring weekend programs that offer alpine flower lovers the opportunity to examine the tiny plants, moss, and lichens under the tutelage of an alpine flower expert—Peg.

She continues to be a Volunteer Naturalist at the AMC lodges and a staple at the Family Camps at Gorman Chairback Lodge where she volunteers the whole week helping families and kids appreciate the finer points of the natural world.

The Maine Chapter is so very lucky to claim Peg Nation as a Maine Chapter volunteer and we enthusiastically endorse the Club’s recognition of all she has accomplished. So if you are on one of Peg’s hikes or happen upon her in the woods or volunteering at an AMC facility, please thank her for all she has done and congratulate her on this award.

For those who retain their personal copies of Wilderness Matters over the years, a more complete biography of Peg’s AMC accomplishments is found in the January 2013 edition’s profile of Peg Nation.
WILDERNESS MATTERS • www.amcmaine.org

WINTER CALENDAR:
OUTINGS | EVENTS | MEETINGS | EDUCATION

A note about the listings: The listings below—presented in date order by category—including only those posted online prior to the submission deadline for this issue of Wilderness Matters. For the most complete and accurate information and up-to-date listings—and so you don’t miss spontaneous outings—please periodically check out the online calendar at www.amcmaine.org/calendar.

For general questions or comments regarding these calendar listings, contact Kathy Baillargeon, Outings Chair, outings@amcmaine.org or (207) 293-2704, thus when contacting trip leaders by doing so before 9:00 PM unless otherwise specified, please and thanks.

Next Deadline for Wilderness Matters (Summer Issue) is June 1, 2015.

Wilderness Matters is your chapter newsletter. Everyone is welcome and encouraged to contribute, be it stories, news, opinions, photos, or whatnot. We want to hear from you! Please send submissions to newsletter@amcmaine.org. Submission guidelines: Articles, opinions, stories and such are limited to 400-500 words maximum (word counts greater than that will be edited or may not be accepted). Photos should be reduced in size to 1024 x 768 pixels or thereabouts and include a photo title and any other identifying info plus proper photo credit. Thank you!

MEETINGS/INSTRUCTION/CELEBRATION

Tuesday, April 14: Harness the power of Sun at AMC’s Solar Social! Harness the power of Sun at AMC’s Solar Social! Tuesday, April 14, 2015! To be held at the public! Curtis Memorial Library, Pleasant St., Brunswick, ME. Doors open at 6:15 PM. The Appalachian Mtn Club, Maine Chapter, is hosting an open forum about solar possibilities here in Maine. Vaughn Thomas, educator, and owner of the nationally recognized Maine based solar company Insoruce Renewables, will be here to break down the nuts and bolts of solar energy. Benjamin Bake, a Unity College graduate with a Bachelor of Science in Sustainable Energy, Design, and Technology will also be here to join the discussion! ‘Investing in solar is like investing in your own personal energy security, while contributing to Maine's own energy security, and energy independence. This Solar Social will give homeowners an opportunity to connect with green Maine folks and work towards the future of a more sustainable Maine. Leader: Lisa Pengel, (207) 212-6464, Before 8PM, amcmainemeetings@gmail.com. SEE FULL DESCRIPTION OF THIS PROGRAM ON P. 4 OF THIS NEWSLETTER.

Saturday, May 2: Advanced Wilderness First Aid (AWFA) Advanced Wilderness First Aid (AWFA) course is being offered to those who have gone through Basic Wilderness First Aid (AWFA) and are looking to broaden their skills. AWFA is aimed at increasing depth than the Basic Wilderness First Aid (AWFA) on the basic first aid subjects. The course emphasizes leadership skills and presents new skills such as litter packaging and traction splitting. This course is two full days, and will be taught at Falmouth Fire/EMS in Falmouth, Maine by Stonehearth Outdoor Learning Opportunities (SOLO). Kim Sanders, 207-712-0862, Before 9PM, kimberlyannsanders@gmail.com. Leader: Peter Roderick, 207-293-2704, roderick1027@fairpoint.net.

Saturday, May 2: WFA (Wilderness First Aid) Basic Wilderness First Aid (WFA) skills are needed when you are more than one hour from medical care, and this training goes beyond standard Red Cross first aid. Learn to assess & treat injuries in outdoor situations. This course is two full days, and will be taught at AMC Audubon in Falmouth, Maine by Stonehearth Outdoor Learning Opportunities (SOLO). The fees cover instruction and materials, and do not include lodging or meals. The class includes patient assessment, immediate life threats, disabling injuries, hypothermia & other environmental hazards, fractures, sprains and strains. Leader: Kimberly Saunders, 207-712-0862, Before 9PM, kimberlyannsanders@gmail.com. Leader: Peter Roderick, 207-293-2704, roderick1027@fairpoint.net.

Thursday, May 7: Maine Chapter Trip Leader’s Meeting This is a meeting for AMC Maine Chapter leaders and those interested in becoming leaders. We will be serving pizza and discussing upcoming events. This is also a great time for those interested in taking AMC trips and sign on to co-lead hikes. All leaders have a chance to work with experienced leaders before leading on their own. The night will include pulling the calendars out to plan some great adventures for the summer months. Time: 6:00-8:00pm Freeport Community Library. Leader: Katherine Baillargeon, 207-240-3784, kbhappytrails@gmail.com.

Thursday, May 14: May ExCom Meeting Maine Chapter Executive Committee meetings every odd month (January, March, May, July, September, and November) on the second Thursday. Important conservation topics, outdoor and educational activities, finance, and other items are discussed. Open to all. Meetings held at the LL Bean Manufacturing Facility Facility in Brunswick. Contact from Brunswick ExCom leader for directions. Leader: Roger David, Chapter Chair, 207-737-9870, Before 9PM, Rd04342@gmail.com.

WILDERNESS MATTERS • www.amcmaine.org
Tuesday, May 19: May 19, 2015 at 7pm at Curtis Memorial Library, 23 Pleasant Street, Brunswick, ME. Doors open at 6:15 PM. PMI email Lisa Pengel at education@amcmaine.org. See FULL DESCRIPTION OF THIS PROGRAM ON PAGE 7 OF THIS NEWSLETTER.

Saturday, June 6: Late Spring Fling and Celebration! Come to celebrate and learn more about the AMC! Meet other folks interested in the outdoors, an executive from AMC, and this year’s Most Prestigious Volunteer Award Recipient - Peter Roderick, a long standing Maine Chapter member. All Maine Chapter members, families, and others are invited to attend a celebration of Peter, his service, and his award. The celebration will run from 11 to 3PM. The event will be hosted at beautiful Maine Audubon. Situated along the Presumpscot River estuary just five minutes from Portland, Maine Audubon’s headquarters features a modern environmental center and a 45-acre sanctuary with more than two miles of trails winding along a pond and through woods, meadow, orchard and salt marsh. Please join us to celebrate recreating in the outdoors and giving back! Leader: Kim Sanders, kim@amcmaine.org. See FULL DESCRIPTION OF THIS PROGRAM ON PAGE 7 OF THIS NEWSLETTER.

Saturday, June 13: June 13, 2015 at the AMC Maine Chapter. Fall in love with the classroom and the outside world! A half-day workshop for sea kayakers. This is not a supported ride, so you will be expected to carry your own equipment and food. This is lots of fun and includes beautiful country riding, farms, woods, meadow, orchard and salt marsh. Please join us to celebrate recreating in the outdoors and giving back! Leader: Kim Sanders, kim@amcmaine.org. See FULL DESCRIPTION OF THIS PROGRAM ON PAGE 7 OF THIS NEWSLETTER.

Tuesday, May 5: Moonlight Walk 5 mile walk on Prouts Neck, Scarborough along the shoreline where Winslow Homer lived and painted. Views include Pine Point, Old Orchard Beach and Homer’s studio. Leader: Lorraine Hussey, 207-619-9444, mhhussey@maine.rr.com before 9 PM.

Saturday, May 7: Bog Ecology: An Exploration of Great Saco Heath Saco Heath is a domed bog, the southernmost in Maine. It is the only known site where Atlantic white cedar occurs in a domed bog ecosystem north of the pocosins - another specialized wetland type - in the Carolinas. Join Main Master Naturalist Jeanne Christie in an exploration of this unique ecosystem. Participants will take a leisurely hike out onto the heath to learn about how a bog is formed and examine the plants and wildlife that have adapted to living in the nutrient poor environment near Saco. Leaders: Jeanne Christie, 207-310-6708, Before 9PM, jeanne.christie@aswm.org, Lawrence De Hof, 207-310-8952, Before 9PM, ldhof@access4less.net.
**NEW BOOK! AMC’s Best Day Hikes Along the Maine Coast**

Appalachian Mountain Club Books is pleased to announce the release of AMC’s Best Day Hikes Along the Maine Coast: Four-Season Guide to 90 of the Best Trails From the Maine Beaches to Down East.

This new guide from the editor of AMC’s popular Maine Mountain Guide lets hikers explore the full length of the rugged coast of Maine. Between the century-old stands of white pine in Vaughn Woods Memorial State Park near Portland, and the oceanfront cliffs and maritime forests of Quoddy Head State Park—the easternmost point in the U.S.—readers will find 50 of the best hikes in the state that can be completed in less than a day.

Acadia National Park is here, including the iconic Isle au Haut, as are multiple hikes in the York County, Casco Bay, Midcoast, and DownEast regions. Beginner hikers and seasoned trekkers alike will discover trails that will satisfy their longing for classic views of the rocky coast of Maine. For short outdoor excursions along the coast of the Pine Tree State, this guide will prove invaluable.

**Inside You’ll Find:**
- 50 of the best coastal day hikes in Maine, carefully selected by the editor of AMC’s Maine Mountain Guide
- A-at-a-Glance Trip Planner to help hikers find the perfect trip, including family- and dog-friendly hikes, and winter hiking trips
- Detailed maps, trail descriptions, difficulty ratings, distances, elevation gain and estimated times
- Directions to trailheads and GPS coordinates for parking areas
- Trip planning, safety tips, and Leave No Trace information

**Praise**

“AMC’s Best Day Hikes Along the Maine Coast is enthusiastically written, thoroughly researched, and a pleasure to read. Carey Kish does a terrific job selecting and describing A-list trips and offers excellent advice on hiking safely and responsibly. Carey’s insightful expertise combined with interesting bits of local knowledge make this book a must-read for any coastal hiker.” —Steve Spencer, Stewardship Director, Damariscotta River Association

**About the Author**

Carey Michael Kish has been exploring the hiking trails along the coast and in the mountains of Maine for more than four decades. Carey is a freelance outdoors and travel writer and photographer, editor of AMC’s Maine Mountain Guide, and writes a regular hiking and camping column for the Portland Press Herald. He lives in Southwest Harbor, Maine.

**Ordering Information for AMC Books**

AMC Books are available nationwide through booksellers and outdoor retailers, and can be ordered directly from AMC at outdoors.org/amcstore or by calling 800-262-4455. AMC members receive a 20% discount.

The e-book versions are available online through Amazon, iBooks, and Barnes & Noble.

**Maine Chapter to Host Wilderness First Aid (WFA) and Advanced WFA**

Have you been hiking with friends and family and wondered what you would do in an emergency situation when you are miles from the road? What would you do if your friend sprained an ankle or worse broke a leg and couldn’t walk out? What if you were with someone who cut themselves and you needed to stop the bleeding? All Maine Chapter leaders are certified in basic wilderness first aid and some have taken the advanced training - you can too!

The Maine Chapter is hosting a Wilderness First Aid (WFA) and Advanced Wilderness First Aid training May 2-3 in Falmouth. This course will be taught by experienced outdoor wilderness medicine instructors from SOLO, if you are interested or have questions, please contact Kim Sanders at: kimberlyannsanders@gmail.com.
Earth Day Film Festival

This Earth Day, longtime conservation partners AMC and Maine Audubon will again join forces to offer a special Earth Day edition of the Maine Outdoor Film Festival. This partnership began in 2013 with a viewing of the climate solutions movie, Carbon Nation, which placed emphasis on economic reasons to change our carbon emissions. Last year, they teamed up with the Maine Outdoor Film Festival to present films that highlight Maine’s abundant outdoor recreation and adventure, with a special emphasis on conservation for this partnership event. Mane-made documentary films featuring snowboarding the Knife’s Edge and whitewater paddling reminded the audience that these activities are dependent on historic weather conditions, some of which are in jeopardy due to climate change. The primary purpose is to entertain while also suggesting that the outdoor activities that we hold dear to our hearts must be protected.

Wednesday, April 22, 2015 at Maine Audubon located at 20 Gilisland Farm Road, Falmouth. Doors and cash bar open at 6:00, films start promptly at 7. Tickets are $5 for members (of either AMC or MA) and $8 for nonmembers. We expect this event to sell out, so advanced registration is encouraged to ensure your seat. Check www.audubon.org for more details. Registrar: Beth Pauls, 207-781-2330, 9-5

For more information visit www.outdoors.org or www.maineaudubon.org

Reconnecting with the Swiss Alps

Join AMC and Maine Audubon to hear about and see pictures of this interesting trip. Karen Herold, her husband, and her sister hiked the Haute Route from Chamonix, France, to Zermatt, Switzerland, in July, 2013. Among many reasons to do this beautiful hike was the chance to reconnect with the Swiss geography and relatives Karen’s family knew growing up with their Swiss father. Long ago Karen was an attorney, and now she’s involved in a variety of environmental causes. She always has her next adventure germinating.

This is a spectacular and demanding hike: a strenuous high-level traverse in the French and Swiss Alps, walking from Chamonix in France to Zermatt in Switzerland.

The route traverses below the summits of ten out of the twelve of the highest peaks in the Alps, and crosses several high passes. The highest pass is at 2964m (9,800ft).

Thursday, May 7, 2015 at 6:30pm at Fields Pond Audubon Center, 216 Fields Pond Road, Holden. Free and open to the public.

Come to AMC’s August Camp 2015 in Oregon’s Central Cascade Mountains

Studded with volcanic peaks, mountain lakes, wildflower meadows, old lava flows and miles of hiking trails, Oregon's Central Cascades is the place to be. Base camp is near Santiam Pass (elevation 4,800’) where the Pacific Crest Trail crosses Route 20. Major hiking destinations include the Deschutes and Willamette national forests and the Three Sisters, Mount Washington and Mount Jefferson wilderness areas. August Camp is a full-service tent village that accommodates 64 campers each week and offers multiple hikes each day for all levels of ability. Delicious meals and trail lunches are provided and great camaraderie and nightly campfires make for a memorable experience. Round trip transportation between August Camp and the Portland (Oregon) International Airport and to and from daily activities is provided.

Camp runs from July 18 through August 15. Plan your one or two week adventure now and be part of one of the AMC’s oldest traditions. More info: www.augustcamp.org. Contact: Sam Jamke, samjamke@gmail.com.
Harness the power of Sun at AMC’s Solar Social!

The AMC Maine Chapter is hosting an open forum about solar possibilities here in Maine. Vaughan Woodruff, solar educator and owner of the nationally recognized Maine based solar company Insource Renewables, will be here to break down the nuts and bolts of solar energy. Benjamin Holt, a Unity recognized Maine based solar company Insource Renewables, will be here to break down the nuts and bolts of solar energy. Benjamin Holt, a Unity

Investing in solar is like investing in your own personal energy security, while contributing to Maine’s own energy independence. This Solar Social will give homeowners an opportunity to connect with great Maine folks working towards the future of a more sustainable Maine.

Lisa Pengel, AMC Maine Chapter, Meetings & Education co-chair, recently interviewed Vaughan Woodruff, to prepare for their upcoming presentation:

V: Have you installed home and business solar systems before?
L: Yes. We install solar electric and solar heating systems on residences and businesses across Maine. Our clients include young families, retirees, municipalities, federal agencies, commercial growers, and other small business.

L: How many years of experience does your company have?
V: I started the business in 2008 while living in Montana. I moved back home to Maine in 2010 and brought the business with me. In recent years we have added key employees with extensive experience, as well.

Our collective in-house experience accounts for nearly 1000 solar projects.

L: Do you have all of the necessary licensing or certifications in Maine?
V: We have two master electricians on staff, one of whom is a nationally certified PV Installation Professional through NABCEP. Three of our staff members hold EPA certificates for handling refrigerants, which is critical to the heat pump division of our company. I am a certified NABCEP Solar Heating Installer and two other members of our staff have held solar heating certifications or licenses in Maine that no longer exist.

L: Can a homeowner tell if they have enough sun for the solar resource?
V: The easiest thing to do is to have a professional look at the roof. We have tools that allow us in minutes to determine the shading at the site throughout the year. Those folks with an Android phone can buy a Solar Shading app that can approximate the shading, as well. To assess the impacts of shading often requires a trip to the roof, so be careful!

L: How do you determine where the system will need to be located on or around the home?
V: The location of a solar array is a balance between performance and aesthetics. We evaluate any impacts of shading using solar assessment tools and consider how we connect the array to the rest of the system. The orientation of the building is also important, as there may be some homes where mounting a system on a wall or on a ground-mounted foundation may be the most preferable option. Some people like the look of solar; others would rather conceal it in a conspicuous area. Most decisions are ultimately driven by cost, which is a big factor in narrowing down one’s options.

L: What type of options will the owner have in selecting a system? (stand-alone system or connected to a utility grid)
V: As you indicate, one big decision is whether to install a grid-tied system, one with batteries, or one that is a combination of both. Tying to the grid creates a great deal of versatility and reduces the installation and operating costs significantly. We have many folks inquire about including a battery backup, and we often encourage them to invest in a generator if their main concern is infrequent power outages. Batteries only make sense if the system is in a remote location or the owner has an independent streak and is willing to pay a bit of a premium.

Another option that folks don’t always consider is a solar water heating system. For a home with 3 or more people or with a boiler that is highly inefficient, a solar water heating system may be a better choice – or may simply be a strong complement to a solar electric system. Since solar heating systems take up a smaller footprint on the roof, they can increase a home’s solar capacity.

Potential solar owners often consider installing a mini-split heat pump to offset fossil fuel use and then use solar electricity to generate the power needed to run the unit.

Other options include installing a ground mounted array or a dual axis trackers that follow the sun throughout the day.

A rather unique option is to utilize virtual net metering, which allows the production of a solar to be applied to up to 10 accounts on the utility. If someone has a farm that has great solar exposure, they could put the system there and apply the energy to the bill at their house as long as it is on the same utility. Solar farms are a complex version of this type of arrangement.

L: How does the owner decide how much electricity they want to produce?
V: The sales process for solar is really an educational process for both us and the client. We learn about the client’s priorities and current energy use in order to recommend a good solution, and we often answer a lot of questions about solar technology and its suitability for our clients. Ultimately, a system sizing comes down to three factors – the amount of energy being used, the amount of available space for installing system, and budget.

L: What is the biggest incentive for a homeowner to go solar?
V: The incentive to make the move really depends upon the priorities of the client. A recurring theme with our clientele is the desire to make their energy bills more predictable. We have a number of clients who are retired - or who will be retiring - and are concerned about fluctuation in energy prices when dealing with fixed retirement funds. We also have a good portion of our clientele who are passionate about climate change and other environmental issues and see the installation of a system as a tangible way to put their values into action. Solar has reached a point where individuals can choose it because it makes sound economic sense, has proven to be an engine for job growth, addresses energy security, or is a clean and responsible choice for our environment. All of these are critical incentives for Maine’s future.

Tuesday, April 14, 2015 at 7pm at Curtis Memorial Library, 23 Pleasant St., Brunswick, ME Doors open at 6-15 FREE and open to the public!

Welcome New Maine Land Staff!!

By Steve Talko, Maine Woods Initiative Land manager

Dave McAndrew, a veritable jack of all trades, has signed on to serve as our Land Department Technician. Dave brings an extensive background in ground and operations management having most recently worked as the Grounds Supervisor at Cheshire Academy in Cheshire CT. Prior to that Dave has a broad range of experience in high-level arborist work and equipment and systems maintenance. We are really excited he has decided to follow his passion for the outdoors and join the team here in Greenville!

It has been a long time in the making but we are so excited to have found some great additions to the AMC team!
Peter Roderick Receives AMC’s “Most Prestigious Volunteer Award”

Longtime Maine Chapter volunteer Peter Roderick was awarded a high honor from the Appalachian Mountain Club during its Annual Summit January 24, 2015. At the event’s evening reception, Senior Vice President Walter Graff announced Peter as recipient of the Distinguished Service Award, the Appalachian Mountain Club’s “most prestigious volunteer award.” The award recognizes AMC volunteers who have “contributed outstanding efforts to the mission of the Club for a sustained period of time, and at the very highest levels. This award highlights long term commitment to enhancing and sustaining the integrity of the Club’s conservation, education and recreation values, with a special acknowledgment that the recipients have developed a complete understanding of the values and goals of the entire organization.”

All Maine Chapter members and others are invited to attend a celebration of Peter, his service, and his award on Saturday, June 6th from 11 to 3pm. The event will include an AMC Executive presenting the award to Peter and recounting his good works in earning the recognition, a potluck lunch for all, and an opportunity for guests to congratulate Peter in person. In accepting the award, we expect Peter will recount many of his more colorful AMC adventures over the years. The celebration will be held at Maine Audubon’s Gilisland Farm facility, 20 Gilisland Farm Road, Falmouth, 04105. Look for further details on the Maine Chapter’s website under activity listings.

Roderick is widely known for his long and varied service to the Maine Chapter and to the Club. Since becoming an AMC member in 1997, Peter has held a number of Club and Chapter leadership positions. Peter has been a Maine Chapter trip leader since 1998, Chair of the Chapter Trails Committee, Chapter Chair, Chair of the Inter-Chapter Trails Committee, Chair of the Maine Chapter’s Maine Wilderness Initiative (MWI) Committee, and Regional Leader for AMC’s Maine Woods Adopt-A-Trail Program.

Through all of Peter’s Chapter and Club-wide roles, two important accomplishments stand out. It’s not that he has unbounded energy to give to the Club and the Chapter, he does; it’s not that he volunteers for whatever needs to be done, he does that as well. What is most important and will last beyond Peter’s years in the Club are the number of AMC and non-AMC hikers Peter has converted to trail volunteers and the number of people Peter has introduced to the MWI. Peter’s infectious attitude toward volunteers and his approach to trail maintenance have sold hikers on the concept of volunteer trail work as partial repayment of the many days of enjoyment they derive from those trails. And Peter is a high-quality and persistent cheerleader for the MWI, introducing scores of folks from all states to the current joys of the MWI and its continued promise for future generations.

Indeed, Peter is “Mr. AMC,” setting a great example for how each of us can and should get out and give back to the outdoors and to the organization we love.

For those who retain their personal copies of Wilderness Matters over the years, a more complete biography of Peter’s AMC accomplishments is found in the Summer 2013 edition’s profile of Peter Roderick.

Go Paperless—Wilderness Matters

Do you prefer to receive this newsletter electronically, sent directly to your e-mail inbox? Register through AMC’s Member Center at www.outdoors.org. If you have difficulty, please call the AMC Membership Department at 1-800-372-1758 (M-F, 9-5 PM EST) or e-mail amcmembership@outdoors.org.

Join the Mountain Birdwatch Survey

Do you enjoy hiking? Are you a birder—or would you like to learn more about bird identification to support a conservation effort? Mountain Birdwatch is a long-term monitoring program for Bicknell’s Thrush and other high-elevation forest birds. We’re looking for beginner to experienced birdwatchers who are strong hikers to conduct a survey in the Adirondacks, Catskills, Green and White Mountains, or Maine. Hike a scenic mountain trail, enjoy the sunrise, and count birds for conservation!

To learn more about Mountain Birdwatch, visit http://vtecostudies.org/projects/mountains/mountain-birdwatch/.

Want to know what you’d do as a volunteer? Check out our volunteer resources here: http://vtecostudies.org/projects/mountains/mountain-birdwatch/participate/.

When you’re ready to select a route to survey in 2015, here’s a list of routes that need volunteers this season: http://vtecostudies.org/projects/mountains/mountain-birdwatch/available-routes/.

Please contact Mountain Birdwatch director Judith Scarl (jscarl@vtecostudies.org) if you’d like to learn more about this exciting program!
Hiking - Prepare for the Possibilities by Denise Fredette

Hiking mountains is an inherently risky pastime. Most of us understand this, and for some of us, the potential challenge is another reason we do it. Weather can change rapidly, terrain can be rugged, and the trail can sometimes be obscured by snow, overgrowth, or faded blazes. The kind of hiking many of us do requires planning and good judgment to mitigate the risks, but, even for the most experienced hikers among us, there will always be risk.

I consider myself a careful hiker. I carry emergency supplies, safety and contingency gear. In the winter I carry even more, and the leaders always carry extra gear, just in case. It’s common for people passing an AMC group by on the trail to ask if we are planning on camping out, even when we are just on a day hike. We chuckle a little at this comment, but the answer is that we are planning for the possibilities. We watch the weather right up until the morning of a hike, trying to predict the unpredictable weather of the mountains in the Northeast. Even still, I have hiked when the weather report called for clear skies all day, yet we were hit with heavy rain and hail on an afternoon descent in August. We have a responsibility to ourselves and the people we are hiking with, to prepare for all of the possibilities.

As a leader, I am required to screen potential hike participants. Some may feel that the AMC has too many requirements to hike mountains, and we ask too many questions of participants. However, AMC hikes are group experiences. A participant’s level of experience, knowledge, and readiness for the particular hike impacts their experience as well as the other hikers’ safety and enjoyment. It is also important information for the leaders to know in order to ensure each hike is a good fit for each hiker.

This past winter there were several incidents in the White Mountain where highly experienced hikers ran into trouble. In one group, a woman lost consciousness near Lake of the Clouds Hut by Mt. Monroe. Her hiking companions called 911, secured her in a sleeping bag, and dragged her in it down the trail to awaiting emergency responders who were able to give her medical care. They were prepared and also knew that they needed to keep moving and get their friend to safety. A week or two later, another woman was not so lucky and perished near the same area during a solo hike, succumbing to extremely high winds and subzero temperatures.

I personally developed frostbite this past winter. I was so vigilant about making sure all of my skin was covered on my face and hands, that I wasn’t thinking about my shirt that came untucked and rode up with the movement of my pack in subzero wind chill.

Hiking has risks, but we can lessen the risks by using good judgment, knowing when to turn back or save the mountain for another day, bringing safety gear and enough layers, knowing how to use the gear that we carry, getting the most up-to-date weather reports for the area we are hiking in, and watching each other’s backs.

To be added to our Events mailing list, email: amcyoungmembers@amcmaine.org
