

Roadkill: Why it Matters !

March 21, 2012, Wednesday, 6pm Potluck, 7pm Presentation
Curtis Memorial Library, 23 Pleasant Street, Brunswick, Maine

-- Free --
Public Warmly Invited

Information about where wildlife attempt to cross Maine roads, what animals are involved, and the kinds of roads with frequent collisions can help inform policy, management, and financial investment in reducing road-kill and habitat fragmentation. Learn how Maine Audubon scientists can use citizen-reported data to improve our understanding of where wildlife attempt to cross roads and what we can do to reduce road-kill and increase safety for people and wildlife. **Barbara Charry of Maine Audubon** will explain why this is necessary, how the data will be used, and how it will benefit both wildlife and our Maine population. Join us for a potluck dinner at 6pm and Barbara Charry at 7pm. Bring a potluck item to share and your own dinnerware (plate, utensils etc.). Drinks will be available. See driving directions at www.amcmaine.org under meetings and education committee. For more information email Chair John Mullens at education@amcmaine.org
