

# Doing Wind Right: Land-based Wind Power in Maine

Forum on September 28, 2011  
Gilsland Farm, Falmouth, Maine

-Free-  
Public Invited

Is it possible to develop land-based wind power as a renewable energy source for Maine while protecting the state's ecological health, natural heritage, and scenic beauty? Join us to hear a panel of speakers representing environmental groups and the wind industry discuss land-based wind power in Maine and its potential contribution to energy production; its ecological, scenic, and recreational effects; and its relative costs and incentives. The panel is David Publicover, AMC's Senior Staff Scientist and wind power expert; Sally Stockwell, Maine Audubon's Director of Conservation; and Josh Bagnato from First Wind, a developer of Maine wind farms. The forum will be moderated by Maine State Representative Bob Duchesne, Chair of the legislature's Environment and Natural Resources Committee. The program is co-sponsored by AMC Maine Chapter and Maine Audubon. Details at [amcmaine.org/calendar/](http://amcmaine.org/calendar/) or email [education@amcmaine.org](mailto:education@amcmaine.org). We will follow up with a tour of a wind farm on Saturday, Oct. 1. Tour signups can be done at the panel, or by contacting [education@amcmaine.org](mailto:education@amcmaine.org)

September 28, 2011, Wednesday, 7-8:30 pm

Maine Audubon's Gilsland Farm, 20 Gilsland Farm Rd, Falmouth, ME 04105
